

TECHNICAL BULLETIN

This bulletin is available to selected partners on a confidential basis. The bulletin will advise you of all known changes since the last update. Program Version is **F53**. Note that this bulletin contains details of changes since last Technical Bulletin.

Important Note—these programs will not run without a security file registration number **69xxxx**. Also remember that if using new Word / Mail links that Outlook and Word must be closed, as well as Datafile, before updating programs.

Edition No 88

March 2016

Number	Application	Description
8801	Sales / Purchase	Update Account / Location Map If select to update an account from the landing page the system didn't always activate the Location Map or Route Map options on the ribbon.
8802		Reprint Period Documents If use the period saved document reprint options was possible to get an error.
8803		Allocation Before Posting / Account Details If posting payments direct in the ledger and allowing allocation before posting then on second and subsequent entries the system kept the display of the account name from the first entry.
8804	Nominal Ledger	Financial Summary Design When editing Financial Summaries if right-click a data item and select Data Item Properties and then Options the system reported an access violation.
8805	Stock Control	View Stock Record / Ledger Enquiry Actions If view stock record on screen and use the Sales Orders link to list the order details if then used the ORDER action to transfer to the Order Enquiry system could report an error.
8806	Payroll	Landing Page Links to Ledger Enquiry If using the employee database record number as the employee number and configured the Ledger Enquiry as one of the 'auto' panel actions the system still prompted for the employee number when selected.
8807		Landing Page Links II If using the unique employee code the system still included the employee record number as the first column meaning that 'auto' panel actions were not actioned.

8808	Job Costing	<p>Landing Page with Contract / Operation Split If Job Costing configured to use split Contract and Operation jobs then when selecting auto-run actions the system didn't update the split correctly.</p>
8809	Order Processing	<p>Replicate Orders If Batch Tracking System Profiles set to allow pre-allocation of batch details but the data items not referenced within the Database Profiles for Sales or Purchase Order Processing then, if replicate an order, the system could omit the replication of selected detail items incorrectly. Version 6 also updated for this.</p>
8810		<p>Order Header Table Items If using table items on the Order Header entry screens then, after use of instant print documents, it was possible to get an exception error on return to the detail entry screens.</p>
8811		<p>Order Processing Landing Page / Salesperson Filters If salesperson filters in use the system didn't restrict the entries displayed on the Order Processing Landing Pages to the matching salesperson analysis code.</p>
8812	Bill of Materials	<p>Change Build Quantity on Order Header If system not set to allow pre-allocation of batches during order entry the system allows you to update the build quantity on the Works Order Header and recalculate the details accordingly. If order was an 'F' status the system offered to update the details but didn't update. Version 6 also updated for this.</p>
8813		<p>F-Status and Update of Stock The system didn't update stock reserved on works order creation but did update during order amendments. Now will update reserved where appropriate. Version 6 also updated for this.</p>
8814	Batch Updates	<p>Import Transactions The speed of transaction imports with the display of progress bar was slower on 2016 than V6.</p>
8815	General	<p>Ledger Enquiry Filters with Location Stock If set filters to hide records on Stock then if use the <F7-Option> key to show all records the system didn't apply the previously selected location but showed records for all locations. Version 6 also updated for this.</p>
8816		<p>Databases on Desktop Where database does not have a prime index database the system prompted for record number in pop-up form with its own ribbon. Now have smaller pop-up for the record number alone. System will also now allow the inclusion of the record number as input item on screen which will suppress the additional pop-up.</p>

8817	General	<p>Calling Batch Files from Main Menu If add a call to a batch file on the main menu then system didn't recognise this action and displayed an invalid action message.</p>
8818		<p>Setup Actions The 'Setup' actions via the main ribbon icon were available for all users when should have been restricted to 'Installer' users.</p>
8819		<p>Landing Page—Ledger Enquiry Actions If configure calls to two Ledger Enquiry Applications on the landing page then the system actioned the same enquiry for both.</p>
8820		<p>Main Menu—Direct Action Calls If main menu configured to call an action directly rather than a menu action then, after first use, the system defaulted to that action and couldn't reselect without first choosing another action.</p>
8821		<p>Document Design—Image Display If images set to use 'image dpi' then the display could be distorted when amending documents depending on the screen resolution.</p>
8822		<p>Menu Design—Calling Alt+B Actions Databases on Desktop can be configured to call up to forty different screens but is possible to restrict entries to selected users or leave gaps in the list. When accessing via a direct call on the menu in 2016 the system tried to access the <i>n</i>th entry in the users list rather than the general list.</p>
8823	Database Systems	<p>Application Menu Design If have a call to the Application Menu Design within the standard Datafile menu structure then the system loaded the Desktop Design options incorrectly.</p>
8824		<p>Database Restructure If the system detects potential invalid data item names when a Datafile database is mirrored to SQL the message displayed has been re-worded to indicate that "Some Item Names May Be Invalid for SQL. If you have any issues created the SQL Table for this Database then please print the Database Definition to Review". Version 6 also updated for this.</p>
8825	ProFiler	<p>Ledger Enquiry Links to Extra Applications If configured an extra application as a ProFiler database then, in use, F8-Zoom, could report an error . Version 6 also updated for this.</p>
