

TECHNICAL BULLETIN

This bulletin is available to selected partners on a confidential basis. The bulletin will advise you of all known changes since the last update. Program Version is **F56E**. Note that this bulletin contains details of changes since last Technical Bulletin.

Important Note—these programs will not run without a security file registration number **69xxxx**. Also remember that if using new Word / Mail links that Outlook and Word must be closed, as well as Datafile, before updating programs.

Edition No 92

November 2016

Number	Application	Description
9201	Order Processing	Document Pick List—Description Only If SOP Document configured for pick list mode then when print didn't include the description only lines when set to do so.
9202		Alerts—Sales Order Entry If have an alert triggered comparing credit limit on the sales accounts with calculation of balance plus outstanding order value the system didn't trigger the alert on add of an order line. Also updated in V6.
9203		Change A/C Code—Credit Checks If enter an order for the main account but use the change account code process to update to the delivery account then could fail as using the delivery account for the credit limit checks. Also updated in V6.
9204		Change A/C Code—Quotes The Change A/C code process was restricted to active orders, will now allow use against quotes. Also updated in V6.
9205		Document Confirm—Cost Price Check If Order Entry set to check sales price against cost price then in document processing after entering the password the system didn't clear the form for password entry overlaying document totals display.
9206		SOP Documents—Physical Qty Check If same stock item listed more than once then system takes both items into account when defaulting the quantities. If user zeroed the default qty on 1st line, amended the 2nd line and then when back to 1st line and entered the full quantity was possible to exceed the physical check.
9207		Order Entry—Amending Existing Order Line If an order line has been part-delivered / invoiced then V6 showed a help bubble containing the delivered and invoiced quantity. In 2016 this now shows on the status bar.

9208	ProFiler	<p>Screen Design When adding items to screen layout was possible to get an Invalid SetDB message.</p>
9209		<p>User-Defined Report / Flagging Input Records If set to flag input records as processed and to refresh SQL at the end process still wrote individual change records to the SQLDET meaning process could run quite slowly. Also updated in V6.</p>
9210	General	<p>Multi-Page Scanning View If DF Window maximised then scan view (TIF format) didn't show on screen correctly and couldn't move to second/third page.</p>
9211		<p>Print Dialog—Cancel If clicked CANCEL on the print dialog the system proceeded with print rather than exit.</p>
9212		<p>Minimise Datafile If current form didn't contain a ribbon (confirm Yes/No pop-up for example) then if Datafile maximised and clicked the icon on the task bar to minimise then, when restored, the system only showed the main form and the Yes/No pop-up.</p>
9213		<p>Print to PDF When print to PDF DF now opens the PDF via Adobe as a separate form rather than within DF. If the PDF not closed and the report / document printed again as the file was open couldn't create a new PDF so reported an error—will now append date/time suffix if the filename is already open.</p>
9214		<p>Exit from DF / Windows 10 When using the V6 programs following Windows 10 update was possible to get a 216 runtime error.</p>
9215		<p>Landing Page / Authority Level Data Items If set authority level against an individual data item the system hides the display of data item content on enquiry/maintenance screens but didn't on landing pages. Will now restrict on landing pages also.</p>
9216		<p>Discount Matrix When adding/updating matrix entries if a little 'keyboard' happy was possible to get an access violation when closing one form and opening another when adding/updating multiple matrix entries in quick succession.</p>

9217	General (cont.)	<p>Company Password If have a password against the default company for the user then could see landing page prior to entering the password—will now prompt for company password as part of user-sign on if the default company for the user has a password.</p>
9218		<p>Cross Company Application Menu's If have an application menu which, as part of the menu layout, changes the current company then selecting the action changed the company but didn't automatically load the action and needed to select again.</p>
9219		<p>Help Bubbles On drop-down lists inputs if the mouse over the help bubble displayed in yellow with pronounced flicker.</p>
9220		<p>Ledger Enquiry / Medium Fonts When using Medium Fonts system increased the size of the text labels on the Enquiry Tabs but not the Tabs themselves meaning looked a little odd.</p>
