

# TECHNICAL BULLETIN

This bulletin is available to selected partners on a confidential basis. The bulletin will advise you of all known changes since the last update. Program Version is **G07**. Note that this bulletin contains details of changes since last Technical Bulletin, entries flagged as (V7) also apply to the older V7 program version.

**Important Note**—these programs will not run without a security file registration number **71xxxx**. Also remember that if using the Microsoft Office Add-Ins that all Microsoft Office programs must be closed, as well as Datafile, before updating.

Edition No 102

October 2018

Number	Application	Description
1	<b>Sales / Purchase</b>	<b>Transaction Entry—Column Widths</b> When Nominal Code set to 10 characters or more then the box grids could display behind the data item. Now sizes the screen grid subject to item sizes. (V7)
2		<b>Allocations—Include Retained Transactions</b> If set to sort the allocations grid if included retained transactions then only included retained entries after the first active transaction. (V7)
3		<b>Turnover History List to Excel</b> If output the history report to Excel the system didn't prefix negative values with the minus sign as required when summing up in Excel. (V7)
4	<b>Nominal</b>	<b>Financial Summaries—Range Hyperlinks</b> If send report to screen then you can define 'hyperlinks' that show details from the account used for that report line. If the line was a range/total value then included the first account twice. (V7)
5		<b>Change Journal Period</b> The form heading / prompts for this option retained the description from the journal reversal options. Updated to reflect this option. (V7)
6		<b>Update from Sales Ledger—Point of Sale Updates</b> If configured for point of sale payment updates then could get an ERangeError when updating summary items. (V7)
7	<b>ProFiler</b>	<b>Landing Pages—Alt+L Actions with No Key</b> If selected an 'auto' action for a record with the primary key for the action undefined reported an error.

8		<p><b>User-Defined Report—Alternate Printer Path</b>  The UDR Report options allow an alternate printer to be set and the drop-down list shows the list of printers defined. There is a maximum length for printer paths that can be stored and, if this exceeded the excess was saved as the file to be created. Will now warn and block selection if printer path exceeds maximum that can be stored. (V7)</p>
9	<b>General</b>	<p><b>Spooler Display</b>  If 'new-style' spool file and activated the horizontal scroll bar as report too wide for form then would flicker when drag and drag back the bar.</p>
10		<p><b>Close Record Set in Data Visualisations</b>  Changed the text warning when close record set that are deleting the set.</p>
11		<p><b>Ledger Enquiry—Stock / Another</b>  If using Location Stock the system would show the location pick list automatically when use the 'Another' button when not configured to do so. (V7)</p>
12		<p><b>Pop-Up Confirmation Prompts</b>  Depending on the Operating System / Screen settings system could not display the full prompt when get popup asking if, for example, OK to Update?</p>
13		<p><b>Business Alerts—Update Todays Date</b>  If configure an alert to update a E-type date item with todays date then if E-type date wouldn't update.</p>
14		<p><b>Contacts / Activities</b>  If a contact has no activities and activities set to list in LIFO order then could get range check error on selection.</p>
