

TECHNICAL BULLETIN

This bulletin is available to selected partners on a confidential basis. The bulletin will advise you of all known changes since the last update. Program Version is **F56B**. Note that this bulletin contains details of changes since last Technical Bulletin.

Important Note—these programs will not run without a security file registration number **69xxxx**. Also remember that if using new Word / Mail links that Outlook and Word must be closed, as well as Datafile, before updating programs.

Edition No 91

September 2016

Number	Application	Description
9101	Sales / Purchase	Manually Generate Payments When process payment but elect not to print the remittance when the system returns to prompt for the next account the screen was not displayed correctly.
9102	Nominal Ledger	Financial Summary Design Options for setting / applying fonts were not available on the new ribbon.
9103	Payroll	KC National Insurance Prefix HMRC rules meant that KC National Insurance prefixes were not on the valid list of prefix codes. KC is now allowed within Datafile but should note that the HMRC RTI processes will not be updated to allow this code until mid-November so you should continue to leave blank in DF until this point.
9104	Order Processing	Document Pick List / One Line Only If document configured to show lines as pick list then if only one line shown and this line was batch tracked then entering quantity didn't pop-up with batch input prompts.
9105		Order Enquiry In V6 the system could optionally display the stock figures within the help bubble, for 2016 this will now be displayed within the status line.
9106		Document Detail Input In POP entry if up-arrow from quantity back to description when description set to display in pop-up form at bottom of the screen was possible to get an error.
9107	ProFiler	Master / Detail Screens If master/detail screen configured to be over more than one page then second and subsequent pages didn't display the master detail correctly.

9108		<p>User-Defined Report Design Options for setting / applying fonts were not available on the new ribbon.</p>
9109		<p>ProFiler Actions to call Direct Datafile Option If ProFiler D03 menu called a ProFiler action which called a direct action (such as the Stock Valuation report) then system would report an error translating the menu.</p>
9110	General	<p>Form Display Changes have been made with regards to occasional issue where the current form drops behind the main form.</p>
9111		<p>Report Generator / Amend Criteria When inserting new criteria lines when amending report layout was possible to get an Invalid SetDB error.</p>
9112		<p>Main Menu Direct Calls If main menu calls an action directly then if select action, process and then reselect the same option didn't open the new action.</p>
9113		<p>Ledger Enquiry / <ESC> from Transaction Grid Users reported an occasional access violation when exiting from transaction grid. Additional protection has been added to prevent this.</p>
9114		<p>Maximise Screen If maximise the main form then this wasn't remembered for subsequent sessions.</p>
9115		<p>Paste Address If using CTRL+V to paste address blocks the system didn't insert <Enters> to move to new line.</p>
9116		<p>Report to PDF If report has no page/font size settings then when print to PDF a variable pitch font was applied causing alignment issues.</p>
9117		<p>Backup Actions Against Menu Options If menu design configured to create a backup file before accessing the option this instruction was not processed.</p>
9118		<p>Ledger Enquiry When select Ledger Enquiry the system remembers the last enquiry action and focuses on that application—if begin typing the code and realise that needed to enquire on another application had to clear the code before could swap.</p>
9119	Manager	<p>Landing Page Configuration When defining actions for landing page system will now allow use of the F7-Option key to select actions from the PREMIER.DFD.</p>
